Preface  xv

1 Historical overview and recent perspectives  1
   David E. I. Wilcken and Bridget Wilcken

PART ONE. BIOCHEMISTRY AND PHYSIOLOGY

Section One. Chemistry

2 Practical chemistry of homocysteine and other thiols  9
   Donald W. Jacobsen

3 Biosynthesis and reactions of homocysteine thiolactone  21
   Hieronim Jakubowski

4 Unique aspects of sulfur chemistry: Homocysteine and lipid oxidation  32
   Jay W. Hemecke

5 Homocysteine, nitric oxide, and nitrosothiols  39
   Andrew J. Gouw, Fred Cobb, and Jonathan S. Stamler

Section Two. Biochemistry and Metabolism

6 Biosynthesis of S-adenosylmethionine  47
   José M. Mato, Mattias A. Avila, and Fernando J. Corrales

7 S-adenosylmethionine-dependent methyltransferases  63
   Steven Clarke and Kelley Banfield

8 S-adenosylhomocysteine hydrolase  79
   Sean T. Prigge and Peter K. Chiang

9 Regulation of homocysteine metabolism  92
   James D. Finkelstein

10 Microbial modeling of human disease: Homocysteine metabolism  100
    Rowena G. Matthews and Martha L. Ludwig

11 Folate metabolism  113
    Robert J. Cook
12 Cobalamin-dependent remethylation
Horatiu Olteanu and Ruma Banerjee

13 Betaine-dependent remethylation
Timothy A. Garrow

14 The transsulfuration pathway
Warren D. Kruger

Section Three. Physiology

15 Transport and tissue distribution of homocysteine
and related S-adenosyl compounds
Brian Fowler

16 Homocysteine and the kidney
John T. Brosnan

17 Homocysteine and the nervous system
Anne M. Molloy and Donald G. Weir

Section Four. Clinical Chemistry

18 Methodologies of testing
Karsten Rasmussen and Jan Møller

19 Methionine loading
Jonathan Silberberg and Nicholas Dudman

PART TWO. CLINICAL DYSFUNCTION AND HYPERHOMOCYSTEINEMIA

Section Five. Genetic Disorders

20 Cystathionine-β-synthase and its deficiency
Jan P. Kraus and Viktor Kožich

21 Inborn errors of folate and cobalamin metabolism
David S. Rosenblatt

22 Polymorphisms of folate and cobalamin metabolism
Rina Rozen

Section Six. Acquired Disorders

23 Folate deficiency
Ralph Carmel

24 Cobalamin deficiency
Ralph Carmel

25 Vitamin B₉ deficiency
Jesse F. Gregory III

26 Homocysteine in renal disease
Margret Arnadottir and Björn Hultberg

27 Diseases and drugs associated with hyperhomocysteinemia
Henk J. Blom

28 Lifestyle factors associated with hyperhomocysteinemia
Stein Emil Vollset, Helga Refsum, Ottar Nygård, Per Magne Ueland

Section Seven. Clinical Consequences in Hyperhomocysteinemia

29 Epidemiology of vascular and thrombotic associations
Petra Verboef and Meir Stampfer

30 Homocysteine and coronary artery disease
Killian Robinson

31 Homocysteine and cerebral vascular disease
J. David Spence and James F. Toole
32 Peripheral arterial disease
   Godfried Boers
   393

33 Venous disease
   Armando D'Angelo and Chiara Beltrametti
   401

34 Homocysteine and hemostasis
   Katherine A. Hajjar
   415

35 Cellular mechanisms of homocysteine pathogenesis in atherosclerosis
   Donald W. Jacobsen
   425

36 Homocysteine and cardiovascular physiology
   Steven R. Lentz
   441

37 Homocysteine and human reproduction
   T.K.A.B. Eskes
   451

Section Eight. Intervention and Therapy

38 Modification of hyperhomocysteinemia
   John M. Scott
   467

39 Design of clinical trials to test the homocysteine hypothesis of vascular disease
   Robert Clarke
   477

40 What is a desirable homocysteine level?
   Johan B. Ubbink
   485

Index
   491
