

# CONTENTS

Preface xv

## CHAPTER 1

### INTRODUCTION TO NUTRITIONAL ASSESSMENT 1

Introduction 1

Good Nutrition Essential for Health 1

Deficiency Diseases Once Common 2

Chronic Diseases Now Epidemic 2

Nutritional Screening and Assessment 2

Nutritional Assessment Methods 3

*Anthropometric Methods* 3

*Biochemical Methods* 3

*Clinical Methods* 3

*Dietary Methods* 4

Importance of Nutritional Assessment 4

Opportunities in Nutritional Assessment 5

Meeting the *Healthy People 2010* Objectives 5

In Hospitals 6

Diabetes Mellitus 6

Weight Management 7

Heart Disease and Cancer 8

Nutrition Monitoring 9

Nutritional Epidemiology 9

Indices of Diet Quality 27

Index of Nutritional Quality 27

*Evaluating Nutrient Content* 27

*Weaknesses of the Index of Nutritional Quality* 28

Diet Quality Index 29

Healthy Eating Index 30

— Dietary Guidelines 31

Early Dietary Guidelines 31

U.S. Dietary Goals 32

*The Dietary Guidelines for Americans* 32

*Toward Healthful Diets* 35

*The Surgeon General's Report on Nutrition and Health* 35

*Diet and Health* 38

Other Dietary Guidelines 38

— Nutrition Labeling of Food 40

U.S. Recommended Daily Allowances 40

The Nutrition Labeling and Education Act 40

Daily Values 43

*Daily Reference Values* 43

*Reference Daily Intakes* 45

— Food Guides 45

Food Guide Pyramid 47

Alternative Food Guides 48

*Mediterranean Pyramid* 49

*Vegetarian Pyramid* 49

— Food Exchange System 50

Assessment Activity 2.1: Using Standards to Evaluate Nutrient Intake 69

Assessment Activity 2.2: Index of Nutritional Quality (INQ) 70

Assessment Activity 2.3: Food Exchange System 71

## CHAPTER 3

### MEASURING DIET 73

Introduction 73

Reasons for Measuring Diet 74

Approaches to Measuring Diet 74

Research Design Considerations 74

Characteristics of Study Participants 76

Available Resources 77

## CHAPTER 2

### STANDARDS FOR NUTRIENT INTAKE 12

Introduction 12

Early Dietary Standards and Recommendations 13

Observational Standards 13

Beginnings of Scientifically Based Dietary Standards 13

Recommended Dietary Allowances 14

Dietary Reference Intakes 16

Estimated Average Requirement 17

Recommended Dietary Allowance 18

Adequate Intake 23

Tolerable Upper Intake Level 24

Uses of the DRIs 25

Nutrient Density 27

Techniques in Measuring Diet 77  
 24-Hour Recall 77  
 Food Record, or Diary 79  
 Food Frequency Questionnaires 80  
     *Willett Questionnaire* 83  
     *Block Questionnaire* 83  
     *Diet History Questionnaire* 84  
     *Strengths and Limitations* 84  
 Diet History 85  
 Duplicate Food Collections 86  
 Food Accounts 87  
 Food Balance Sheets 88  
 Telephone Interviews 88  
 Photographic and Video Records 89  
 Computerized Techniques 90  
     *Nutrition Evaluation Scale System* 90  
     *Computer-Assisted Self-interviewing* 91  
 Surrogate Sources 91  
 Considerations for Certain Groups 92  
 Issues in Dietary Measurement 92  
     Validity 92  
         *Use of Biological Markers* 94  
         *Energy Expenditure and Weight Maintenance* 96  
         *Factors Affecting Validity* 97  
     Reproducibility 97  
     How Many Days? 97  
 Estimating Portion Size 100  
 Assessment Activity 3.1: Collecting a 24-Hour Recall 108  
 Assessment Activity 3.2: Completing a 3-Day Food Record 110  
 Assessment Activity 3.3: Diet History Questionnaire 110

CHAPTER 4

NATIONAL DIETARY AND NUTRITION SURVEYS 111  
 Introduction 111  
 Importance of National Dietary and Nutrition Surveys 112  
 Nutritional Monitoring in the United States 113  
 National Nutritional Monitoring and Related Research Program 113  
 Role of the U.S. Department of Agriculture 114  
     Food Disappearance 115  
     Continuing Survey of Food Intakes by Individuals 118  
     Diet and Health Knowledge Survey 119  
     Supplemental Children's Survey 119  
     Food Insecurity and Hunger 120  
     Nationwide Food Consumption Surveys 121  
 Role of the U.S. Department of Health and Human Services 121  
     National Health Examination Surveys 122  
     Ten-State Nutrition Survey 122  
     National Health and Nutrition Examination Survey 122  
         *First National Health and Nutrition Examination Survey (NHANES I)* 122  
         *Second National Health and Nutrition Examination Survey (NHANES II)* 123

*Hispanic Health and Nutrition Examination Survey (HHANES)* 123  
*Third National Health and Nutrition Examination Survey (NHANES III)* 123  
*The Future of NHANES* 127  
 Other DHHS Surveys 127  
 Dietary Trends 130  
     Sources of Food Energy 130  
     Trends in Carbohydrates 132  
     Trends in Sugars 134  
     Trends in Dietary Fats 135  
     Trends in Dairy Products 135  
     Trends in Beverages 137  
     Trends in Red Meat, Poultry, and Fish 138  
     Trends in Fruits and Vegetables 138

CHAPTER 5

COMPUTERIZED DIETARY ANALYSIS SYSTEMS 144  
 Introduction: Using Computers in Nutritional Assessment 144  
 Factors to Consider in Selecting a Computerized Dietary Analysis System 145  
     Nutrient Database 145  
         *USDA Nutrient Data Laboratory* 145  
         *USDA Nutrient Databases* 147  
         *Criteria for Developing High-Quality Databases* 149  
     Program Operation 155  
     System Output 156  
     Computerized Dietary Analysis Systems 157  
 Dietary Analysis on the Internet 158  
 Assessment Activity 5.1: Analysis of Your 24-Hour Recall on the Internet 161  
 Assessment Activity 5.2: Comparison of Computerized Dietary Analysis Systems 162  
 Assessment Activity 5.3: Internet Sources for Sound Nutrition Information 162

CHAPTER 6

ANTHROPOMETRY 163  
 Introduction 164  
 What Is Anthropometry? 164  
 Measuring Length, Stature, and Head Circumference 164  
     Length 165  
     Stature 165  
     Nonambulatory Persons 166  
     Head Circumference 166  
 Measuring Weight 167  
     Infants 167  
     Children and Adults 167  
     Nonambulatory Persons 168  
 CDC Growth Charts 168  
 Weight Standards 172  
     Height-Weight Tables 173  
     Age-Specific Weight Standards 173

Limitations of Height-Weight Tables	173
Strengths of Height-Weight Tables	177
Measuring Frame Size	177
Height-Weight Indices	178
Relative Weight	178
Power-Type Indices	179
Body Fat Distribution	182
Body Composition	183
Cadaveric Studies	184
Skinfold Measurements	185
Assumptions in Using Skinfold Measurements	185
Measurement Technique	186
Site Selection	187
Chest	187
Triceps	187
Subscapular	188
Midaxillary	188
Suprailiac	189
Abdomen	189
Thigh	190
Medial Calf	190
Single-Site Skinfold Measurements	191
Two-Site Skinfold Measurements	191
Multiple-Site Skinfold Measurements	193
What Is a Desirable Level of Fatness?	194
Densitometry	195
Underwater Weighing	195
Equipment	196
Procedure	196
Weaknesses of Underwater Weighing	198
Air Displacement Plethysmography	198
Total Body Water	200
Total Body Potassium	201
Neutron Activation Analysis	201
Creatinine Excretion	202
3-Methylhistidine	202
Electrical Conductance	202
Bioelectrical Impedance	203
Total Body Electrical Conductivity	203
Infrared Interactance	204
Ultrasound	204
Computed Tomography	204
Magnetic Resonance Imaging	205
Dual-Energy X-Ray Absorptiometry	205
Assessment Activity 6.1: Assessment and Classification of Body Weight	214
Assessment Activity 6.2: Body Composition Evaluation Using Skinfold Measurements	215

## CHAPTER 7

### ASSESSMENT OF THE HOSPITALIZED PATIENT 216

Introduction	216
Assessing Nutritional Status	217
Nutritional Screening	217
Nutritional Assessment	219
History	220

Dietary Information	220
Physical Examination	220
Knee Height	221
Estimating Stature	222
Midarm Circumference	223
Calf Circumference	224
Recumbent Skinfold Measurements	225
Estimating Body Weight	226
Arm Muscle Area	227
Determining Energy Requirements	228
Measuring Energy Expenditure	230
Direct Calorimetry	230
Indirect Calorimetry	230
Doubly Labeled Water	232
Bicarbonate-Urea Method	232
Estimating Energy Needs	233
Harris-Benedict Equations	233
World Health Organization Equations	233
Energy Expenditure in Disease and Injury	234
Energy Needs: Estimated or Measured?	235
Determining Protein Requirements	236
Protein Losses in Disease and Injury	236
Estimating Protein Needs	236
Nutrition Screening Initiative	237
Public Awareness Checklist	238
Screening Tools	241
Assessment Activity 7.1: Estimating Stature and Body Weight	249
Assessment Activity 7.2: Arm Muscle Area	250

## CHAPTER 8

### NUTRITIONAL ASSESSMENT IN DISEASE PREVENTION 251

Introduction	252
Coronary Heart Disease	252
Coronary Heart Disease Risk Factors	252
Serum Lipids and Lipoproteins	253
Lipoproteins, Cholesterol, and Coronary Heart Disease	255
Lipoprotein Ratios	256
Triglyceride and Coronary Heart Disease	257
Estimating CHD Risk	257
National Cholesterol Education Program's Guidelines	260
Assessing Risk for Coronary Heart Disease	260
Therapeutic Lifestyle Changes	262
Lowering Cholesterol in the Population	265
Coronary Heart Disease in Children and Adolescents	266
Reducing Cholesterol Levels in Children and Adolescents	266
Dietary Treatment in Coronary Heart Disease	267
Saturated Fatty Acids	268
Trans Fatty Acids	270
Dietary Cholesterol	271
Total Calories	271
Total and Unsaturated Fat	272
Protein and Carbohydrate	272
General Principles	273

- Issues in Measuring Lipid and Lipoprotein Levels 273  
*Precision* 273  
*Accuracy* 274  
*Total Analytical Error* 275  
*Sources of Error in Cholesterol Measurement* 275
- Hypertension 276  
*Body Weight* 279  
*Sodium* 280  
*Alcohol* 280  
*Physical Activity* 280  
*Dietary Pattern* 280
- Osteoporosis 281  
 Bones: Structure and Remodeling 282  
 Osteoporosis: Classification and Risk Factors 282  
 Bone Densitometry 283  
*Radiogrammetry* 283  
*Single-Photon Absorptiometry* 284  
*Dual-Photon Absorptiometry* 284  
*Quantitative Computed Tomography* 284  
*Dual-Energy X-Ray Absorptiometry* 284  
*Quantitative Ultrasound* 285  
 Prevention and Treatment 286
- Diabetes Mellitus 287  
 Types of Diabetes 287  
 Diagnosis of Diabetes 288  
*Blood Glucose* 288  
*Oral Glucose Tolerance Test* 288  
*Self-monitoring of Blood Glucose* 289  
*Glycosylated Hemoglobin* 290  
 Medical Nutrition Therapy 291
- Assessment Activity 8.1: Lipid and Lipoprotein Levels and  
 Coronary Heart Disease Risk 301
- Assessment Activity 8.2: Calculating 10-Year Coronary Heart  
 Disease Risk 302
- 
- CHAPTER 9**
- 
- BIOCHEMICAL ASSESSMENT OF NUTRITIONAL  
 STATUS 303**
- Introduction 304  
 Use of Biochemical Measures 304  
 Protein Status 305  
 Creatinine Excretion and Creatinine-Height Index 306  
 3-methylhistidine 306  
 Nitrogen Balance 306  
 Serum Proteins 307  
*Albumin* 307  
*Transferrin* 307  
*Prealbumin* 309  
*Retinol-Binding Protein* 309  
*Insulin-like Growth Factor-1* 309  
*Fibronectin* 310  
 Immunocompetence 310  
*Nonspecific and Antigen-Specific Immunity* 310  
*Total Lymphocyte Count* 310  
*Delayed Cutaneous Hypersensitivity* 311
- Iron Status 311  
 Stages of Iron Depletion 311
- Serum Ferritin 312  
 Transferrin, Serum Iron, and Total Iron-Binding  
 Capacity 314  
 Erythrocyte Protoporphyrin 314  
 Hemoglobin 314  
 Hematocrit 315  
 Mean Corpuscular Hemoglobin 315  
 Mean Corpuscular Volume 315  
 Models Assessing Impaired Iron Status 316
- Calcium Status 316  
 Serum Calcium Fractions 317  
 Urinary Calcium 317
- Zinc Status 318  
 Serum Zinc Concentrations 318  
 Metallothionein and Zinc Status 318  
 Hair Zinc 319  
 Urinary Zinc 319  
 Functional Indicators 319
- Vitamin A Status 319  
 Serum Levels 320  
 Relative Dose Response 320  
 Conjunctival Impression Cytology 321  
 Dark Adaptation 321  
 Direct Measurement of Liver Stores 321
- Vitamin C Status 321  
 Serum and Leukocyte Vitamin C 322  
 Other Approaches 322
- Vitamin B<sub>6</sub> Status 322  
 Plasma and Erythrocyte Pyridoxal 5'-phosphate 323  
 Plasma Pyridoxal 323  
 Total Vitamin B<sub>6</sub> 324  
 Urinary 4-pyridoxic Acid 324  
 Tryptophan Load Test 324  
 Methionine Load Test 325  
 Erythrocyte Transaminases 325
- Folate Status 325  
 Serum Folate 326  
 Erythrocyte Folate 327  
 Deoxyuridine Suppression Test 327
- Vitamin B<sub>12</sub> Status 327
- Blood Chemistry Tests 329  
 Alanine Aminotransferase 329  
 Albumin and Total Protein 329  
 Alkaline Phosphatase 330  
 Aspartate Aminotransferase 330  
 Bilirubin 330  
 Blood Urea Nitrogen 330  
 Calcium 330  
 Carbon Dioxide 330  
 Chloride 330  
 Cholesterol 330  
 Creatinine 331  
 Glucose 331  
 Lactic Dehydrogenase 331  
 Phosphorus 331  
 Potassium 331  
 Sodium 331  
 Triglyceride 331
- Assessment Activity 9.1: Visiting a Clinical Laboratory 337

Assessment Activity 9.2: Chemistry Profile, Complete Blood Count, and Coronary Risk Profile 337

## CHAPTER 10

CLINICAL ASSESSMENT OF NUTRITIONAL STATUS 338

Introduction 338

Medical History 338

Dietary History 339

Subjective Global Assessment 342

Elements of the History 343

Elements of the Physical Examination 343

Protein-Energy Malnutrition 344

Clinical Signs 344

Classifying Protein-Energy Malnutrition 346

HIV Infection 347

Eating Disorders 349

Mini Nutritional Assessment 350

Assessment Activity 10.1: Using Subjective Global Assessment 355

## CHAPTER 11

COUNSELING THEORY AND TECHNIQUE 356

Introduction 356

Communication 357

Verbal Communication 357

Nonverbal Communication 358

Effective Communication 358

Listening 359

Interviewing 360

Interviewing Skills 360

Obtaining Information 360

Counseling Theories 361

Person-Centered Approach 361

Behavior Modification 362

*Antecedents and Consequences* 362

*Self-monitoring* 362

*Goals and Self-contracts* 363

*Modeling* 363

*Reinforcers* 364

*Behavior Modification Techniques*

*Summarized* 364

Rational-Emotive Therapy 364

Reality Therapy 366

Initiating and Maintaining Dietary Change: A Practical Plan 367

Motivation 367

Characteristics of Effective Counselors 367

Initial Assessment 368

Initiating Dietary Change 368

Maintaining Dietary Change 368

Relapse Prevention 369

Knowing One's Limits 369

Assessment Activity 11.1: Counseling Practice 372

*Appendix A: Dietary Reference Values for Food Energy and Nutrients for the United Kingdom* 373

*Appendix B: The U.S. Recommended Daily Allowances (U.S. RDAs)* 376

*Appendix C: 1998 Continuing Survey of Food Intakes by Individuals 24-Hour Recall Form* 377

*Appendix D: Food Record Recording Form* 389

*Appendix E: Third National Health and Nutrition Examination Survey Food Frequency Questionnaire* 391

*Appendix F: Database and Age- and Sex-Specific Portion Sizes for Food Items on Screening Questionnaire for Fat Intake Shown in Chapter 3* 398

*Appendix G: MEDFACTS Dietary Assessment Questionnaire* 401

*Appendix H: Harvard University School of Public Health Food Frequency Questionnaire* 403

*Appendix I: The Youth/Adolescent Questionnaire, a Food Frequency Questionnaire Designed by Researchers at Brigham and Women's Hospital and Harvard University for Assessing the Dietary Intake of Older Children and Adolescents* 422

*Appendix J: The Diet History Questionnaire (DHQ)* 435

*Appendix K: Food Composition Tables* 444

*Appendix L: 2001 Behavioral Risk Factor Surveillance System Questionnaire* 510

*Appendix M: Suppliers of Nutritional Assessment Equipment* 517

*Appendix N: 2000 CDC Clinical Growth Charts* 519

*Appendix O: Triceps Skinfold Norms from NHANES II* 530

*Appendix P: Subscapular Skinfold Norms from NHANES II* 533

*Appendix Q: Means, Standard Deviations, and Percentiles of Sum of Skinfold Thickness (mm) by Age for Males and Females of 1 to 74 Years (See Table 7.2 for Interpretation Guidelines)* 536

*Appendix R: Means, Standard Deviations, and Percentiles of Upper-Arm Muscle Area (cm<sup>2</sup>) by Age for Males and Females of 1 to 74 Years (See Table 7.6 for Interpretation Guidelines)* 538

*Appendix S: Reference Values for Serum Total Cholesterol and Serum High-Density Lipoprotein, by Sex, Age, Race/Ethnicity, 1988–1994* 540

*Appendix T: Example of a Form That Can Be Used for Self-Monitoring Eating Behavior* 549

*Appendix U: Competency Checklist for Nutrition Counselors* 550

**Glossary** 553

**Index** 565
