Preface to the First Edition	viii	CHAPTER 3 The Three-Dimensional Aspect: Structure Contours	16
Preface to the Second Edition	ix	3.1 Introduction	16
List of Exercise Maps	xi	3.2 The Nature of Structure Contours	16
List of Plates	xi	3.3 Examples of Structure Contours on Maps	17
CHAPTER 1 Some Fundamentals of Geological Maps	1	3.4 Structure Contours Derived from Borehole/Well Information	18
1.1 Introduction	1	3.5 Structure Contours Derived from Topography – The Theory	21
1.2 The Topographic Base Map	2	3.6 Structure Contours Derived from Topography – The Practice	23
1.2.1 Scale	2	3.7 Structure Contours Derived from Topography and Boreholes	25
1.2.2 Map projection	3	3.8 Straight Structure Contours	27
1.2.3 Grid systems and location	3	Summary of Chapter	27
1.2.4 Relief	3	Selected Further Reading	27
1.2.5 Key, explanation, or legend	4	CHAPTER 4 Measurements in Three Dimensions: Strike and Dip, Formation Thickness and Depth	38
1.3 Geological Aspects	6	4.1 Introduction	38
1.3.1 Key, explanation, or legend	6	4.2 Strike and Dip	38
1.3.2 Superficial and bedrock maps	7	4.3 Apparent Dip	41
1.3.3 The third dimension – geological cross-sections	7	4.4 Formation Thickness	42
1.3.4 The interpretive nature of maps	7	4.5 Formation Depth	45
1.3.5 Aesthetics	8	4.6 The 'Three-Point Method'	48
Summary of Chapter	8	Summary of Chapter	48
Selected Further Reading	8	Selected Further Reading	49
CHAPTER 2 The Nature of Geological Maps: The 'Ten Mile' Map of the UK and the 1:2 500 000 Map of the USA	9	CHAPTER 5 Geological Cross-Sections	58
2.1 Introduction: Cartographic Matters	9	5.1 Introduction	58
2.2 Interpretation of the Maps: Geology and Relief	9	5.2 Line of Section	58
2.3 Map Patterns and Geological Structure	10	5.3 Scale and Vertical Exaggeration	59
2.3.1 Dipping formations	10	5.4 Manual Drawing of Cross-Sections	61
2.3.2 Unconformities	12	5.5 Structure and Stratigraphic Sections	63
2.3.3 Folded rocks	12	5.6 Three-Dimensional Diagrams	63
2.3.4 Faulted rocks	12	5.6.1 Fence diagrams	63
2.3.5 Igneous rocks, and geological histories	14	5.6.2 Block diagrams	66
2.4 Conclusion	14		
Summary of Chapter	14		

Summary of Chapter	68	9.2 Strike-slip faults on maps	120
Selected Further Reading	68	Summary of Chapter	120
		Selected Further Reading	122
CHAPTER 6 Visual Assessment of Outcrop Patterns	72	CHAPTER 10 Igneous and Metamorphic Rocks, Mineral Deposits, and Superficial Deposits	130
6.1 Introduction	72	10.1 Introduction	130
6.2 Horizontal Formations	72	10.2 Igneous Rocks	130
6.3 Dipping Formations	72	10.2.1 Volcaniclastic rocks	130
6.3.1 Recognition	72	10.2.2 Magmatic rocks	132
6.3.2 Assessment of formation dip in valleys	75	10.3 Metamorphic Rocks	132
6.4 Vertical Formations	77	10.4 Mineral Deposits	134
6.5 Assessment of Formation Thickness	77	10.5 Superficial Deposits	135
Summary of Chapter	78	Summary of Chapter	140
		Selected Further Reading	142
CHAPTER 7 Unconformities	81	CHAPTER 11 Geological Histories from Maps	148
7.1 Introduction	81	11.1 Introduction	148
7.2 Terminology	81	11.2 Sedimentary Rocks	148
7.3 Recognition on Maps	81	11.3 Deformed Rocks	151
7.4 Associated Features	85	11.4 Non-Sedimentary Rocks	152
7.5 Use on Maps	85	11.5 Superficial Deposits	154
7.6 Palaeogeological Maps	87	11.6 Reading a Geological Map	157
Summary of Chapter	89	11.7 Writing a Map Report	157
Selected Further Reading	89	Summary of Chapter	160
CHAPTER 8 Folds	94	CHAPTER 12 Maps in Environmental Geology	162
8.1 Introduction	94	12.1 Introduction	162
8.2 Description from Maps	94	12.2 Hydrogeological Aspects	162
8.2.1 The parts of a fold	94	12.3 Economic Deposits	165
8.2.2 Fold orientation	95	12.4 Construction Conditions	167
8.2.3 Fold attitude	96	12.5 Hazards	168
8.2.4 Fold shape	96	12.6 Waste Disposal	176
8.2.5 Fold style	97	12.7 Planning Advice	180
8.2.6 Fold dimensions	97	Summary of Chapter	182
8.3 Visual Assessment on Maps	97	Selected Further Reading	182
8.4 Measurements on Maps	99	CHAPTER 13 Wider Uses of Geological Maps: Understanding the Landscape	183
Summary of Chapter	102	13.1 Introduction	183
Selected Further Reading	102	13.2 Physical Landscape	184
		13.3 Soils, Vegetation, and Habitat	185
CHAPTER 9 Faults	106	13.4 Human Activities	189
9.1 Introduction	106	13.5 The England–Wales Borderlands (Plate 1)	191
9.2 Fault Parts, Orientation, and Dimensions	106	13.6 Western USA (Plate 2)	192
9.3 Fault Displacement	107	13.7 Example: The Weald, SE England	193
9.4 Classification of Faults	107	13.8 Example: The Pennsylvania Turnpike, Eastern USA	196
9.5 Visual Assessment on Maps	109	Selected Further Reading	198
9.6 Measurements on Maps	114		
9.7 Contraction (Thrust) Faults	116		
9.7.1 Characteristics	116		
9.7.2 Thrust faults on maps	118		
9.8 Extension Faults	119		
9.8.1 Characteristics	119		
9.8.2 Extension faults on maps	119		
9.9 Strike-Slip Faults	119		
9.9.1 Characteristics	120		

CHAPTER 14 The Heritage of Geological

Maps	199
14.1 Introduction	199
14.2 A Short History of Geological Maps	199
14.3 The Contributions of Some Individuals	202
14.3.1 Jean Etienne Guettard (1715–86)	202
14.3.2 William Smith (1769–1839)	203
14.3.3 John MacCulloch (1773–1835)	204
14.3.4 John Phillips (1800–74)	205
14.3.5 John Wesley Powell (1834–1902)	206
14.3.6 Edward Greenly (1861–1951)	207
14.3.7 Sir Edward Bailey (1881–1965)	210
14.3.8 J. David Love	212

CHAPTER 15 The Production of Geological

Maps	215
15.1 Introduction	215

15.2 The Field Survey	215
15.3 Storage and Manipulation of Map Data	217
15.4 Preparation of Maps for Publication	217
15.4.1 Scale	217
15.4.2 Boundaries	218
15.4.3 Key, and other information	218
15.4.4 Ornament	218
15.4.5 Colour	218
15.5 Availability of Maps	219
15.6 Justification of Geological Map Costs	220
15.7 Conclusions	220
Summary of Chapter	221
Selected Further Reading	221
Solutions to Map Exercises	224
References	248
Index	253
